Pain Points:

- A website which is difficult to use.
- A website which takes time to load and update and display data.
- A website which displays wrong information.

Goals:

- A website which is easy to access and edit information into.
- A website which displays the entered information correctly and in time.
- A website which satisfies the user needs by displaying the information in correct format.
- A website that does not allow un-authorized users to change or delete any data.

I would like to use this product because:

- It is easy to use and would help me update the details of matches, players and teams without much difficulty.
- The information entered is displayed precisely and without any error.
- The information entered is made available to the user without much delay.
- It differentiates between normal and admin users which leads to the data being safe-guarded.
